USER INTERFACE DESIGN

EXPERIMENT – 8

Topic: Design Storyboards for Mobile E-commerce App using Balsamiq

NAME: ABIRAMI L **ROLL NO: 240701010**

AIM:

To create storyboards representing the user flow for a mobile e-commerce application using Balsamiq**.**

Tool Used

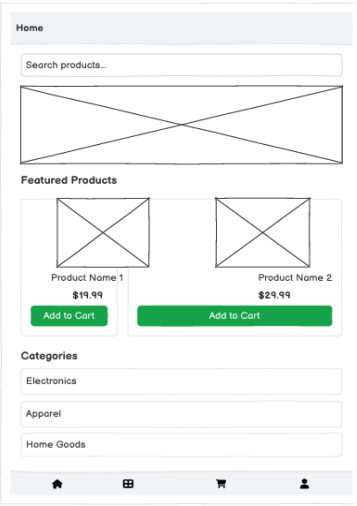
- Balsamiq Wireframes

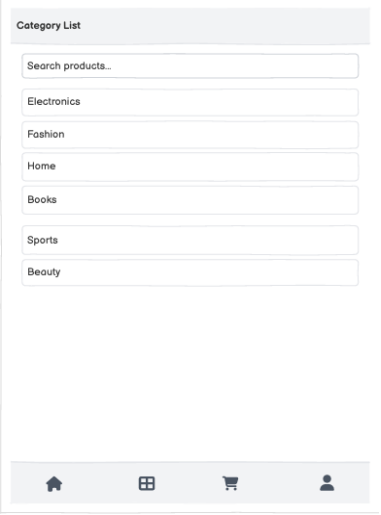
Procedure

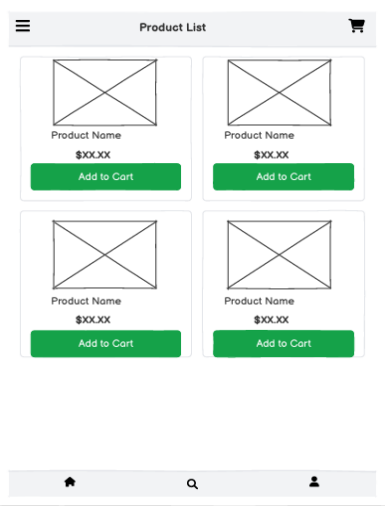
- Open Balsamiq and create a new project
- Identify key screens like Home, Categories, Product List, etc.
- Add wireframe screens using the "+" option
- Design each screen using UI components (buttons, images, text fields)
- Arrange screens in proper order
- Connect screens using arrows to show user flow
- Keep the design simple and clean

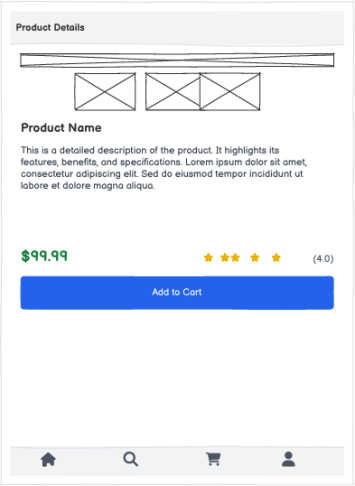
User Flow

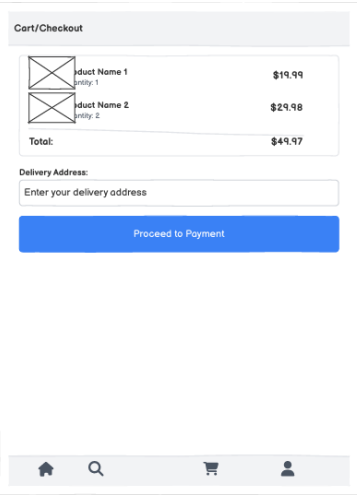
Home → Categories → Product List → Product Details → Cart → Payment → Order Confirmation

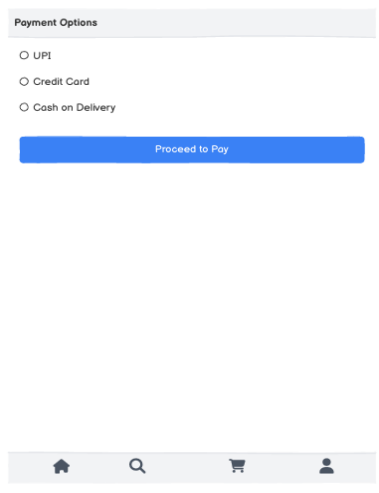


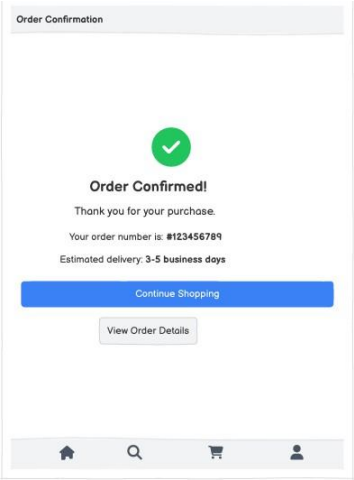












1. Home Screen

- Contains search bar, banner, and featured products
- Helps user start browsing

2. Categories Screen

- Shows categories like Electronics, Fashion
- Helps filter products

3. Product List Screen

- Displays product list with price and Add to Cart button
- Allows users to select items

4. Product Details Screen

- Shows full product information
- Helps user decide purchase

5. **Cart / Checkout Screen**

- Shows selected items and total price
- Allows entering delivery address

6. **Payment Screen**

- Displays payment options like UPI, Card, COD
- User completes payment

7. **Order Confirmation Screen**

- Shows success message and order details
- Confirms order placement

Result

The storyboard for a mobile e-commerce application was successfully created using Balsamiq, representing the complete user flow from product browsing to order confirmation.
